*Suitable for the treatment of sport
and work-related:*

Lateral epicondylitis (tennis elbow)

Medial epicondylitis (golfer's elbow)

Ref.: T29

>epicondylitis strap

Designed to alleviate the excessive strain put on the epicondyle during sporting activity.

- > Anatomical infra-condyle pad that unloads the tendon and produces a massage effect. 100% silicone. Encapsulated in absorbent fabric for greater comfort. Repositionable.
- > Elastic strap for dynamic compression adjustment.
- > Anatomical structure to make adjustment to the forearm easier.
- > Hypoallergenic non-slip support to prevent the strap from rotating.
- > Breathable seamless fabric for maximum comfort.
