An effective ally for the sports practice

New line of orthosis for sports

P. Industrial Nº 1
Calle F, 15
28938 Móstoles - Madrid - SPAIN

Technology that suits you

SKIN TECH 3D

The **Aqtivo** elastic bandages, structured in **lightweight and flexible 3D fibers**, adapt like a second skin, providing a soft and beneficial compression during sports practice.

Its selective compression areas, **protect the muscles and joints from overloads, favor blood circulation and boost proprioception levels** for better sports performance.

An effective ally for the sports practice

fabric **AirQuick**

Designed for maximum breathability, all **Aqtivo** elastic bandages incorporate **AirQuick** fabric, which quickly **absorbs and expels moisture to the outside**, allowing the continuous flow of air

Dry skin, total comfort.

Total comfort

Knee, ankle, wrist, ... The elastic bandages **Aqtivo** provide comfort and stability in the joints for an adequate sport practice.

New line of orthosis for sports

activo

sport

Anatomical shape for a more secure fit and greater freedom of movement.

Soft elbow flexure area that favours use throughout the day.

Anatomical silicone padding for lateral epicondylitis that helps distribute pressure on the lateral/medial epicondyle, eliminating tension and relieving pain.

Forearm strap to selectively reinforce pressure at the point of pain.

Seamless for greater comfort without chafing.

Elastic elbow support

Indications: Stabilisation and compression after minor elbow injuries. Mild osteoarthritis of the elbow, lateral and medial epicondylitis, postoperative inflammatory conditions, post injury, tendinitis, light bruising. Preventative Measures during sporting and work activities. Proprioceptive stimulation.

Ref./Size	Measures
P707 S	23-27
P707 M	27-31
P707 L	31-35
Elbow perimeter (cm)	

P707

Adapts naturally to the wrist to eliminate tension and relieve pain.

Wrist strapping to selectively reinforce compression.

Seamless for greater comfort without chafing.

Elastic wrist support

Indications: Stabilisation and compression after minor wrist injuries. Mild osteoarthritis of the wrist, general wrist pain, tendinitis, light bruising. Preventative Measures during sporting and work activities. Proprioceptive stimulation.

sport

Adapts naturally to the wrist to eliminate tension and relieve pain.

Wrist strapping to selectively reinforce compression.

Seamless for greater comfort without chafing.

Elastic metacarpal wrist support

Indications: Stabilisation and compression after minor wrist injuries. Mild osteoarthritis of the wrist, sprains, chronic post injury or postoperative inflammatory conditions, tendovaginitis. Preventative Measures during sporting and work activities. Proprioceptive stimulation.

Ref./Size Measures

P704

Elastic thigh support

Anatomical shape for a more secure fit and greater freedom of movement.

Decreasing degree of compression (distal-proximal) that improves blood circulation, reduces muscle fatigue and promotes resistance, minimising the risk of injury.

Integrated non-slip system to prevent the orthosis from slipping, ensuring that it remains in place during movement.

Seamless for greater comfort without chafing.

Indications: Stabilisation and compression after muscle injuries to the thigh. Quadricep muscle tears, muscle strains, post injury. Preventative Measures during sporting and work activities. Proprioceptive stimulation.

Ref./Size	Measures
P709 S	43-48
P709 M	48-52

Elastic knee support

Integrated non-slip system to prevent the orthosis from slipping, ensuring that it remains in place during movement.

Anatomical shape for a more secure fit and greater freedom of movement.

Soft popliteal area that favours use throughout the day.

Seamless for greater comfort without chafing.

Indications: Stabilisation and compression after minor knee injuries. Mild osteoarthritis and arthritis of the knee, minor injury and instability, mild sprains, joint effusion and inflammation. Preventative Measures during sporting and work activities. Proprioceptive stimulation.

Ref./Size	Measures
P700 S	32-36
P700 M	36-41

Elastic knee support with silicone padding and side stabilizers

Integrated non-slip system to prevent the orthosis from slipping, ensuring that it remains in place during movement.

Anatomical shape for a more secure fit and greater freedom of movement.

Soft popliteal area that favours use throughout the day.

Anatomical patella pad that centres the kneecap, helping to disperse tension and reduce stress on the knee. Protects against tendon overload and minimises the risk of injury. Together with the compression fabric, it contributes to the reduction of inflammation and bruising.

Side stabilising stays for greater mediolateral control.

Seamless for greater comfort without chafing.

Ref./Size	Measures
P701 S	32-36
P701 M	36-41
P701 L	41-48
Knee perimeter (cm)	

P701

Indications: Stabilisation and compression after minor knee injuries. Mild osteoarthritis and arthritis of the knee, minor injury and instability, mild sprains, joint effusion and inflammation, postoperative inflammatory conditions, recurrent joint effusion, tendency to instability. Preventative Measures during sporting and work activities. Proprioceptive stimulation.

Elastic calf support

Anatomical shape for a more secure fit and greater freedom of movement.

Decreasing degree of compression (distal-proximal) that improves blood circulation, reduces muscle fatigue and promotes resistance, minimising the risk of injury.

Seamless for greater comfort without chafing.

Ref./Size	Measures
P708 S	29-35
P708 M	35-40
P708 L	40-44

Calf perimeter (cm)

P708

Indications: Stabilisation and compression after muscle injuries to the calf. Calf muscle tears, muscle strains, post injury, protection of the tibia. Preventative Measures during sporting and work activities. Proprioceptive stimulation.

Elastic ankle support with silicone malleolar pads

Anatomical shape for a more secure fit and greater freedom of movement.

Soft instep area that favours use throughout the day.

Anatomical silicone padding over the malleoli that helps disperse tension and reduce stress on the ankle, providing stabilisation. Protects against tendon overload and minimises the risk of injury.

Seamless for greater comfort without chafing.

Ref./Size	Measures
P705 S	17-20
P705 M	20-23
P705 L	23-26
Ankle perimeter (cm)	

P705

Indications: Stabilisation and compression after minor ankle injuries. Mild osteoarthritis and arthritis of the ankle, minor injury and instability, joint contusions, distortions and effusions, chronic irritation, postoperative and post injury, ligament weakness. Preventative Measures during sporting and work activities. Proprioceptive stimulation.

Elastic ankle support with silicone malleolar pads and figure-of-eight strapping

Ankle perimeter (cm)	

P706

Anatomical shape for a more secure fit and greater freedom of movement.

Soft instep area that favours use throughout the day.

Anatomical silicone padding over the malleoli that helps disperse tension and reduce stress on the ankle, providing stabilisation. Protects against tendon overload and minimises the risk of injury.

Functional figure-of-eight strapping that enables selective immobilisation and provides stability under high loads.

Seamless for greater comfort without chafing.

Indications: Stabilisation and compression after minor ankle injuries. Mild osteoarthritis and arthritis of the ankle, minor injury and instability, joint contusions, distortions and effusions, chronic irritation, postoperative and post injury, ligament weakness. Preventative Measures during sporting and work activities. Proprioceptive stimulation.
