BACK SUPPORTS

SEMIRIGID BACK SUPPORTS MAX

Characteristics

The main fabric of the back support is a fabric elastic bilayer, composed of two stretch fabrics. Its main feature is the breathability that has thickness and elasticity of the fabric in all the directions, which facilitates adaptability. Comfortable, lightweight and high contention.

Effects

Contention and lumbar support.

Indications

Lumbago, Lumbosciatic, Lumbocruralgia, Discartrosis, Disc disease, Osteoporosis, Osteomalacia, Postoperative disk herniation.
